

# Fond du Lac County

## 2023 WORKFORCE PROFILE

## 2022 Wisconsin Overview

Wisconsin's economy broke numerous records during 2022, as the rebound from the COVID-19 pandemic continued.

During January through April, the state achieved a record low seasonally adjusted unemployment rate of 2.8%, while also achieving record lows in initial and continuing weekly unemployment insurance claims. As the number of unemployed people trended downward, construction employment reached a record high, and the manufacturing industry also experienced strong growth.

By year end, the state had regained 99% of the 404,000 jobs lost during the COVID-19 pandemic, including the short, sharp recession of March and April 2020. In addition to the strong rebound in jobs during 2022, Wisconsin's real GDP reached record highs and the state concluded the year with a record high state surplus approaching \$7 billion.

While Wisconsin's year-ending labor force participation rate of 64.6% remained more than 2 percentage points above the national average, demographic trends including the aging and retirement of Baby Boomers contributed to the labor quantity challenge. Concerns over inflation, compounded by China's response to the COVID-19 pandemic and resulting supply chain disruptions, also defined the year.

As demand for workers grew throughout 2022, employers voiced concerns about their inability to attract talent and workers in general. This is unlikely to change in the foreseeable future. The primary underlying challenge is the demographic situation as Baby Boomers exit the workforce. This lifecycle event will continue to complicate employers' ability to find workers and talent. These demographic problems extend beyond Wisconsin and affect the upper Midwest, the U.S. as a whole, much of Western Europe, and in fact, the developed world. Even China faces a talent shortage.

## EMPLOYMENT

Wisconsin's labor force held relatively steady through the pandemic, while employment dropped severely and then recovered quickly. See Graphic 1.

The employment gyrations pushed the unemployment rate to 14.1% in April 2020. As employment recovered, the unemployment rate fell to new lows of 2.8% in March and April of 2022. As of December 2022, Wisconsin's seasonally adjusted unemployment is 3.2%.

## SHORT-RUN OUTLOOK

The short-run outlook for the state looks positive. Job levels continue at high levels, registering gains in 10 out of 12 months in 2022.

Job gains coupled with higher wages translate into healthy consumption, which makes up two-thirds of the economy. Wage gains have been robust. However, the surge in inflation brought about by supply chain disruptions and the war in Europe have undercut the gains in real terms. We expect high inflation to be transitory while wage gains will be permanent. With continued job and wage gains, consumption will be the underpinning of economic growth.

The most prominent economic risk is the Federal Reserve Bank (Fed) aggressively combatting inflation through higher interest rates. The Fed raised interest rates seven times in 2022 – going from essentially zero to 5%. They set a range of 25 basis points. As of March 1, 2023 the range is 4.7 – 5%. Interestingly, Fed fiscal policy contributed to inflation pressures over the last few years.

Experts expect that inflation pressures will ease as supply chains readjust. As inflation pressures ease, the Fed will be able to conduct a more accommodative monetary policy. Tighter fiscal policy will have an influence over the coming years as well.

Businesses continue to voice lack of workforce talent as the primary constraint on production growth. Pursuit of workers has brought about wage and benefit increases, signing bonuses, and other incentives to attract workers. However, other workforce barriers such as transportation, dependent care, housing affordability, and the uncertainty of workplace safety surrounding COVID-19. Solutions to these barriers are discussed below.

## LONG-RUN CHALLENGE

Workforce quantity is the primary challenge facing Wisconsin's economic future. The demographic dynamics facing the state, other upper-Midwest states, the U.S., and most of the developed economies will advance unaltered in the coming decades.

While Wisconsin's population will continue to grow over the next 20 years, the workforce faces serious constraints. The labor force trend began to seriously flatten in 2008 after slowing in the late 1990s as the first baby boomers (those born in 1946) reached age 62 and began to leave the workforce. Baby boomers continue to exit the workforce in great numbers and will continue to do so over the next 20 years.

The number of retiring baby boomers nearly match the influx of new workers, resulting in a slow-growing workforce. This constrains employers' ability to secure talent across industries. Many businesses report that the lack of available workers has hindered expansion, and in some cases, even curtailed the ability to meet current business needs.

**Graphic 2: Wisconsin Population and Labor Force**

Source: WI DWD, OEA Special Tabulation

There are four solutions to the macroeconomic labor quantity challenge: 1) offshoring production, 2) immigration, 3) mitigating barriers to employment of the chronically unemployed, and 4) technological advancement. Critical to the technology solution is the concomitant match of labor skills with technologies' sophistication. This is true for designing, building, installing, operating, and maintaining the advanced technology being put in place as well as for development of the infrastructure and facilities needed to support technological progress: broadband, power, water, transportation.

Worker skills must align with skills demanded by the position. If you have the talent and not the job, the talent goes elsewhere. If you have the job and not the talent, the job goes elsewhere. For Wisconsin to successfully compete in the global economy, the state needs to attract and retain every body it can and educate and train everybody to match the requirements of the new technologies.

## FOUR SOLUTIONS

## Fond du Lac County

### POPULATION AND DEMOGRAPHICS

Fond du Lac County's total population has remained largely unchanged in recent years. Since the 2020 Census, the county's population increased minimally, adding eight residents. The county's two largest cities, Fond du Lac and Ripon, collectively lost 260 residents during this time period. However, these declines were offset by population gains elsewhere. Among the rest of the county's major municipalities, the Town of Empire was the only other to experience a population decrease.

**Graphic 3: 10 Most Populous Municipalities in County**

	2020 Census	2022 Final Estimate	Numeric Change	Percent Change
Fond du Lac, City	44,678	44,470	-208	-0.5%
Ripon, City	7,863	7,811	-52	-0.7%
North Fond du Lac, Village	5,378	5,385	7	0.1%
Taycheedah, Town	4,554	4,598	44	1.0%
Fond du Lac, Town	3,687	3,721	34	0.9%
Waupun, City	3,549	3,583	34	1.0%
Empire, Town	2,774	2,769	-5	-0.2%
Friendship, Town	2,748	2,756	8	0.3%
Auburn, Town	2,360	2,387	27	1.1%
Campbellsport, Village	1,907	1,924	17	0.9%
<b>Fond du Lac County</b>	<b>104,154</b>	<b>104,162</b>	<b>8</b>	<b>0.0%</b>
<b>Wisconsin</b>	<b>5,893,718</b>	<b>5,949,155</b>	<b>55,437</b>	<b>0.9%</b>

Source: WI Dept. of Administration, Demographic Services Center

Natural increase and net migration are the two sources of population change. A natural increase in population occurs when there are more births than deaths, while an increase through net migration arises when more people enter the county than exit. Fond du Lac County's rate of change across both sources were lower than their statewide counterparts. Specifically within the county, the 0.3% net migration rate was just enough to offset the -0.3% natural increase rate, resulting in an overall 0.1% increase. Natural increase is largely a function of age, which provides one way of illustrating state level workforce quantity issues on a local scale.

**Graphic 4: Components of Population Change**

Source: Demographic Services Center, WI Dept. of Administration

## EMPLOYMENT BY INDUSTRY

Employment changes in 2021 were unsurprisingly less volatile than the prior year. Nevertheless, job totals will be compared to 2019 as a pre-pandemic benchmark. Employment in Fond du Lac County increased by 1.9% or 825 jobs across all industries from 2020 to 2021. In comparison, Wisconsin's total employment grew by 2.4% during the same time period. As of 2021, employment in the county was 5.1% below the 2019 total while Wisconsin's total employment was 3.1% below 2019.

**Graphic 5: Employment Change by Industry**

	2021 Average Monthly Employment	1-year Numeric Change	1-year Percent Change	2-year Numeric Change	2-year Percent Change	Percent of Total Employment
Construction	3,006	58	2.0%	36	1.2%	6.6%
Education & Health Services	8,992	-130	-1.4%	-921	-9.3%	19.9%
Financial Activities	1,661	-241	-12.7%	-311	-15.8%	3.7%
Information	792	3	0.4%	-75	-8.7%	1.8%
Leisure & Hospitality	3,790	120	3.3%	-571	-13.1%	8.4%
Manufacturing	11,111	731	7.0%	-311	-2.7%	24.6%
Natural Resources & Mining	1,190	8	0.7%	15	1.3%	2.6%
Other Services	1,241	40	3.3%	-95	-7.1%	2.7%

Source: WI DWD, Labor Market Information, QCEW 2021

Eight of 11 local industries registered growth between 2020 and 2021. However, eight industries remained below 2019 levels. The three largest industries in terms of employment share are manufacturing; education and health services; and trade, transportation, utilities. These three industries make up 63.4% of total employment and 61.1% of the overall decrease in employment.

The leisure and hospitality industry still stands out in terms of disproportionate employment losses since 2019. The industry accounted for 23.4% of the county's jobs decline despite making up 8.4% of total employment. However, with 3.3% annual growth in 2021, leisure and hospitality also experienced relatively rapid employment recovery. Other industries that experienced high rates of employment decline relative to 2019 include financial activities and education and health services.

## TOTAL MONTHLY EMPLOYMENT

The monthly employment data in Graphic 6 provides updated local employment trends, extending through March 2022. In addition, seasonal patterns are also evident here, with employment typically reaching a bottom in February and peaking in August. With these seasonal changes in mind, it's necessary to compare employment changes using the same month across different years. For example, total employment in Fond du Lac County was 41,087 in August 2021 and 42,908 in August 2019.

Graphic 6: QCEW Monthly Employment

Source: WI DWD, Labor Market Information, QCEW Second Quarter

Local employment declined by over 7,500 jobs (18.6%) in April 2020, and the subsequent recovery period was inconsistent. The most rapid rebound occurred in the late spring and early summer of 2020, but recovery slowed in winter of 2020, during another wave of COVID-19 infections. Jobs growth continued throughout much of 2021 and into 2022 as well. As of March 2022, local employment stood at 40,317, representing a 12 month gain of 1,225. That is still 440 jobs lower than the March 2020 level of 40,757.

Fond Du Lac County's labor market recovery from COVID-19 is incomplete as local employment totals remain short of early 2020 levels, even without considering pre-pandemic growth trends. In the short term, the jobs outlook remains uncertain amid concerns over inflation, international supply chain disruptions, pandemic-induced behavioral changes, and subsequent monetary policy responses. Expected changes over the longer term will be covered in the discussion of industry and occupational employment projections.

## UNEMPLOYMENT AND LABOR FORCE PARTICIPATION

In contrast to the Great Recession, the unemployment increase at the onset of COVID-19 was more severe but less persistent. While Fond du Lac County's unemployment rate peaked at 10.8% in the aftermath of the financial crisis, in April 2020 it climbed more than 13 percentage points to 16.5%. The economy recovered rapidly after the most stringent lockdowns were lifted; however, throughout 2021 and 2022, the local unemployment rate has continued to trend toward pre-pandemic levels. The December 2022 rate of 1.8% was the same as December 2021, which is notable given current economic uncertainties and inflation trends.

**Graphic 7: Unemployment Rate**

Source: Local Area Unemployment Statistics (LAUS), Bureau of Labor Statistics

Many of the current labor market challenges existed well before COVID-19. Fond du Lac County's labor force participation rate (LFPR) has trended downward since 2000, when the oldest baby boomers were in the late stages of their prime working years. As of 2021, the local LFPR of 68% was more than 0.7 percentage points higher than 2020. However, this recent bump is relatively minor compared to the 7.3 percentage point decline since 2000.

**Graphic 8: Labor Force Participation Rate**

## BARRIERS TO FULL UTILIZATION

As Fond du Lac County's population ages and baby boomers exit the workforce, a long-term workforce quantity challenge arises. Therefore, it is increasingly important to address barriers that prevent people achieving their full employment potential. Although there is no single solution to demographically driven staffing challenges, four common barriers persist across areas and industries. These barriers are transportation, housing, childcare, and broadband access.

### Transportation

Lack of reliable transportation can prevent individuals from pursuing opportunities and employers from filling good-paying positions. In Fond du Lac County, 91.2% of employed residents rely on a car to get to work, with over 80% driving alone. The average commute time for residents is 20.1 minutes.

Inter-county commuting dynamics in the county are mostly in-line with the state, as evidenced by the similar share of residents commuting out of the county (28.9%) and the higher workers who live in a different county (28.6%). These data may change as the impact of COVID-19 manifest into permanent structural changes. However, most incumbent workers will continue to rely on a car to get to work. Transportation as a condition of work leads to a conflict: qualified individuals could fill a job if they had transportation and could afford transportation if they had a job.

**Graphic 9: Means of Transportation**

	Wisconsin	Fond du Lac County
Drive Car	87.6%	91.2%
Drive Alone	79.9%	83.6%
Mean Commute Time - Residents	22.2	20.1
Mean Commute Time - Workers	21.9	19.5
% of Residents Working in another County	28.0%	28.9%
% of Workers Residing in another County	24.3%	28.6%

Source: US Census Bureau, American Community Survey, 2020 5-year File

## Housing

Housing affordability and availability are barriers making it difficult for workers to relocate for job opportunities. The Department of Housing and Urban Development uses 30% of income as a guideline for housing affordability. Like the state, renters in Fond du Lac County are more likely than homeowners to allocate more than 30% of their income to housing. Early data shows that this issue is worsening, as home values and monthly rent increased at an accelerated rate between 2020 and 2022. Two ways to bring this share down would be to 1) provide more housing at a lower cost and 2) increase earnings.

Lack of availability makes it difficult for individuals to find housing even if cost isn't an issue. Housing availability is difficult to quantify, but one way of looking at the issue is to view the age distribution of existing housing stock. Slightly less than half of Fond du Lac County's housing stock (49.1%) was built before 1970, which is more than 4.2 percentage points greater than the statewide rate of 44.9%. By contrast, a relatively small share of local housing was built in latter decades, particularly after the turn of the millennium. Only 15.4% of Fond du Lac County's housing stock was since 2000; compared to 16.8% statewide.

Source: US Census Bureau, American Community Survey, 2020 5-year File

**Graphic 11: Housing Share by Year Built**

Source: US Census Bureau, American Community Survey, 2020 5-year File

## Childcare

Due to its high cost, childcare is a significant barrier to employment for families across Wisconsin. Childcare costs in Fond du Lac County exceed statewide levels across all three age groups, with monthly costs ranging from \$595 for a school-aged child and \$782 for an infant. In addition to cost, childcare availability is also a barrier to employment. The YoungStar provider database tracks 82% of childcare providers in the state. According to the database, Fond du Lac County has 33 total providers with a potential capacity of 1,587 children. This capacity is relatively low in comparison to the state. There are 10 childcare slots for every 100 children under the age of 14 in Fond Du Lac County compared to 14 statewide. Even families that have childcare struggle with disruptions to access. Easing the cost and access burden would allow parents to attain their full employment potential. Employers could also improve participation by providing flexibility to employees with childcare responsibilities.

**Graphic 12: Childcare Capacity**

	Wisconsin	Fond du Lac County
Providers	3,863	33
Maximum Capacity	132,075	1,587
Capacity/100 Children Under 14**	0.14	0.10

Source: Wisconsin Department of Children and Families, Youngstar Database

**Graphic 13: Childcare Cost**

Source: Center for Women's Welfare, Uni. of Washington, 2019 Self-Sufficiency Standards

## Broadband

Innovations in the work-from-home economy and virtual learning environment arose during the pandemic. Employers can use these innovations developed out of necessity to meet Wisconsin's workforce needs. For example, increased work-from-home options could alleviate talent shortages by providing flexible scheduling options that benefit workers. Despite these benefits, broadband internet availability issues limit employers and employees who need high-speed internet to make remote operations possible.

Graphic 14 displays broadband internet access distribution across households. Nearly 16% of households in Fond du Lac County do not have internet, which is 0.8 percentage points higher than the state. Lack of access is especially notable in households earning less than \$20,000, where 42.3% of households do not have broadband access. It is more difficult for individuals living in these households to take advantage of virtual employment, training, and education opportunities.

**Graphic 14: Percent of Households that **DO NOT** have Internet Access by Annual Household Income**

	Wisconsin	Fond du Lac County
Total	14.8%	15.6%
Less than \$20,000:	38.4%	42.3%
\$20,000 to \$74,999:	17.5%	19.1%
\$75,000 or more:	4.6%	5.1%

## INDUSTRY EMPLOYMENT PROJECTIONS

Graphic 15: Industry Employment Projections

Industry	2020 Employment	Projected 2030 Employment	Employment Change	Percent Change (2020-2030)
Total All Industries	203,474	214,775	11,301	5.6%
Natural Resources and Mining	6,443	5,957	-486	-7.5%
Construction	10,104	11,234	1,130	11.2%
Manufacturing	43,829	45,759	1,930	4.4%
Trade, Transportation, and Utilities	32,032	33,969	1,937	6.0%
Information	3,036	2,865	-171	-5.6%
Financial Activities	7,830	7,894	64	0.8%
Professional and Business Services	15,633	16,716	1,083	6.9%
Education and Health Services	37,901	41,191	3,290	8.7%
Leisure and Hospitality	13,902	16,185	2,283	16.4%
Other Services (except Government)	10,323	11,238	915	8.9%
Public Administration	10,621	11,028	407	3.8%
Self Employed and Unpaid Family Workers	11,820	10,739	-1,081	-9.1%

While studying past trends is useful, DWD also produces projections of industry and occupation employment into the future. The state is split into 11 Workforce Development Areas (WDAs) and projections are updated every two years. Fond du Lac County is part of the Fox Valley WDA, which includes six counties in northeast Wisconsin. DWD's projections methodology accounts for retirements, career changes, and changing demand.

Regional employment is expected to grow by 5.6% or over 11,000 jobs from 2020 to 2030. Statewide employment is projected to grow at a slightly faster rate during the same timeframe (6.3%). Growth is projected to be stronger in service industries than product industries, due in large part to a projected rebound in the leisure and hospitality industry. Note that these projections only forecast levels of filled positions rather than potential demand, which further illustrates the issues associated with an aging population. Job growth is expected to continue, despite declines in labor force growth. Employers find it difficult to replace workers even if overall employment in the industry declines. Businesses already face difficulty replacing retirees' positions, and this difficulty will expand to filling new openings, too. This could constrain job growth by limiting expansion. Although solutions will be different for each business, they will likely include a combination of talent pipeline development, increased focus on talent attraction and retention, engagement of under-utilized populations, increased automation, and retention of retirees in non-conventional work arrangements.

## OCCUPATIONAL EMPLOYMENT PROJECTIONS

Graphic 16: Occupational Employment Projections

Occupation Title	2020 Employment	Projected 2030 Employment	Occupational Openings	Percent Change (2020-2030)
Total All Occupations	203,474	214,775	24,022	5.6%
Management	11,674	11,608	952	-0.6%
Business and Financial Operations	10,782	11,270	1,002	4.5%
Computer and Mathematical	3,618	3,822	279	5.6%
Architecture and Engineering	4,674	5,137	374	9.9%
Life, Physical, and Social Science	1,357	1,402	133	3.3%
Community and Social Service	2,538	2,906	305	14.5%
Legal	717	762	56	6.3%
Education, Training, and Library	12,283	13,001	1,173	5.9%
Arts, Design, Entertainment, Sports, & Media	2,243	2,340	236	4.3%
Healthcare Practitioners and Technical	10,758	11,604	706	7.9%
Healthcare Support	7,670	8,997	1,136	17.3%
Protective Service	3,691	4,012	512	8.7%
Food Preparation and Serving Related	13,525	15,379	2,765	13.7%
Building & Grounds Cleaning & Maintenance	4,691	4,980	655	6.2%
Personal Care and Service	5,372	6,239	905	16.1%
Sales and Related	16,200	16,883	2,250	4.2%
Office and Administrative Support	24,066	23,430	2,554	-2.6%
Farming, Fishing, and Forestry	3,675	3,259	497	-11.3%
Construction and Extraction	10,217	11,183	1,140	9.5%
Installation, Maintenance, and Repair	8,042	8,696	856	8.1%
Production	28,764	29,556	3,222	2.8%
Transportation and Material Moving	16,917	18,309	2,316	8.2%

DWD's occupational projections are used for workforce and career planning. This current cycle of projections implements the separations methodology, which more accurately captures the churns of the labor market by estimating the number of openings induced by workers who leave the labor force entirely (exits) and workers who change jobs and leave an occupation (transfers). Graphic 16 provides a more accurate idea of occupations that will be in demand in the future. The fastest-growing occupational groups in terms of percentage change are healthcare support; personal care and service; community and social service; food preparation and serving; and architecture/engineering.

Over 45% of the projected annual openings in the Fox Valley are concentrated in four occupational groups: production; food preparation and serving; office and administrative support; and transportation. This result might be unexpected to some because two of these areas are projected to grow less than the Fox Valley overall. Taking a more detailed look at the sources of openings will help explain why. Even though there are several occupational groups that have a larger number of openings due to growth, the number of openings induced by exits and transfers is more than enough to compensate. One of the main takeaways here is that there will be jobs in fields not associated with "high growth" due to the openings brought about by other causes.
