

Wisconsin Department of Workforce Development Office of Economic Advisors

<https://jobcenterofwisconsin.com/wisconomy/pub/economist>

The Office of Economic Advisors (OEA) analyzes labor force and economic data to help users better understand the relationship and interaction between labor markets and economic development. OEA helps users interpret labor force data and assists in determining the trends and influences on regional and state economic development.

OEA publishes periodic reports that provide overviews of county and state labor force and economic trends. These include County Workforce Profiles and state and regional Employment Projections. OEA also produces ad hoc papers on topics relevant to labor force and economic development in the State of Wisconsin. OEA supports private sector customers and public sector customers.
